

PROJECT

Note : Find all the UI mocks in the link -> [figma link](#)

Intro

In this project, we will build a react app with a multi-step form to submit candidate hiring details.

Requirements

1. This app will contain only a single page i.e the home page.
The page will look like the one below. (refer to desktop main page image).
2. Make the UI as per the mocks but the main area of focus for this project is the multi-step form so working of the search bar and cart icon is not important, they can be just a static component and don't do anything.
3. Now comes the most important part working on the form
The form will be divided into 3 steps.

When a user visits the website the default step is 1st step.

We will show only one step content at a time and to indicate which step the user is on we show the stepper at the top.

Refer below image

Steps of Form

The image displays three sequential mockups of a multi-step form titled "Share your hiring requirements". Each mockup features a stepper at the top with three steps: 1 (orange), 2 (blue), and 3 (blue). The first mockup (Step 1) contains fields for First Name*, Last Name*, Designation* (with example "Eg. HR head"), Company* (with placeholder "Enter company name"), Work Email* (with placeholder "Enter email"), and Work Phone Number* (with placeholder "Enter phone number"). The second mockup (Step 2) contains fields for Role You Are Hiring For*, Compensation (In LPA)* (with From and To sub-fields), Years of Experience* (with a dropdown for "Select required exp."), Onsite/Remote* (with a dropdown for "Select any"), Number of positions* (with placeholder "Enter the num. of positions"), and Job Type* (with radio buttons for Full-time, Part-time, Internship, and Freelance). The third mockup (Step 3) contains fields for Location* (with a dropdown for "Select Type") and Timeline (in days) (with placeholder "Enter the timeline"). It also includes a file upload section with a "Drag & drop or Browse your file" button and "Max Upto 2 MB" text, a CAPTCHA section with "I'm not a robot" and a "Recaptcha" logo, and a Terms and Conditions section with a checkbox and text: "I authorize 'Eduonix Learning Solutions Pvt Ltd' and its representatives to Call, SMS, Email or WhatsApp me for the same. This consent overrides any registration for DNC/NDNC". Each mockup has an orange "Next" button at the bottom.

Note: every step has required values and you can't proceed to next step until all the fields are completed.

If the user tries to click on next button without filling required inputs then show error message just like below.

Error Usecases

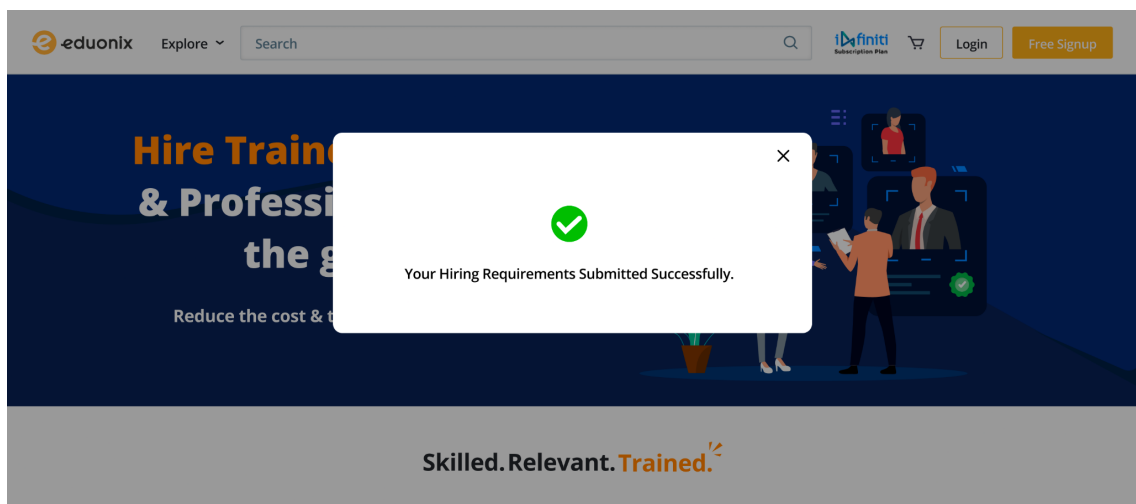

The image displays three sequential screenshots of a web form titled "Share your hiring requirements". Each screenshot represents a different step in the process, indicated by numbered tabs (1, 2, 3) at the top.

- Step 1:** The form has fields for "First Name*", "Last Name*", "Designation*", "Company*", "Work Email*", and "Work Phone Number*". Each field has a placeholder text and a red error message below it: "Please enter First name", "Please enter Last name", "Please enter Designation", "Please enter Company", "Please enter Work Email", and "Please enter Phone Number". A "Next" button is at the bottom.
- Step 2:** The form has fields for "Role You Are Hiring For*", "Compensation (In LPA)*", "Years of Experience*", "Onsite/Remote*", "Number of positions*", and "Job Type*". Each field has a placeholder text and a red error message below it: "Please enter Role", "Please enter Compensation", "Please select required experience", "Please select Type", "Please enter Number of Position", and "Please select Job Type". A "Next" button is at the bottom.
- Step 3:** The form has fields for "Location*", "Timeline (in days)", a file upload area, a CAPTCHA, and a consent checkbox. Each field has a placeholder text and a red error message below it: "Please enter Location", "Please enter Timeline", "Please Upload PDF", "You can't leave Captcha Code empty", and "I authorize 'Eduonix Learning Solutions Pvt Ltd' and its representatives to Call, SMS, Email or WhatsApp me for the same. This consent overrides any registration for DNC/NDNC". A "Get a Callback" button is at the bottom.

4. Form submit

Once user reach step 3 and all the inputs are filled after clicking on Get a Callback button we will submit the form.

On submitting the form show a popup with a success message like below.

Note: don't submit the form to any API. after submission you can console the form values somewhere and reset the form to step 1 again.

Note regarding file upload input:

- In step 3 we have a file upload input where we accept pdf file upto only 2MB max size.
- User can add multiple files but each file should be max 2MB
- Don't upload the file content to any API. show a loader with 3 sec delay just to mimic that file is uploading to a server

5. Responsive

The website will be responsive with below view as mobile view
